

## Social Cyber-Security Dynamics

Kathleen M. Carley  
[Kathleen.carley@cs.cmu.edu](mailto:Kathleen.carley@cs.cmu.edu)

All Metrics and Visualization capabilities are in ORA-PRO

## Social Cyber-Security

- the science to characterize, understand, and forecast **cyber-mediated** changes in human behavior, social, cultural and political outcomes

*and*

- the engineering to build the cyber-infrastructure needed for **society** to persist in its essential character in a **cyber-mediated** information environment under changing conditions, actual or imminent social cyber-threats

2 Carnegie Mellon

## Echo Chamber

- A group that exhibits high connectivity in the community and content space
- This high level of connectivity leads to:
  - a lack of objectivity
  - a focus on common stories
  - a sense of sharing
  - suspicion or hostility to newcomers with different narratives
  - rapid interaction with others with similar narratives.

## Traditional Information Warfare

- Dismiss
  - Belittle what is being said
- Distort
  - Twist the facts
- Dismay
  - Create fear inducing narratives
- Distract
  - Create or support a very different narrative

## What is Manipulatable

Posts, narratives  
 --- features of these  
 affect, emotional cues,  
 presence of memes, images,  
 font, cohesiveness ...

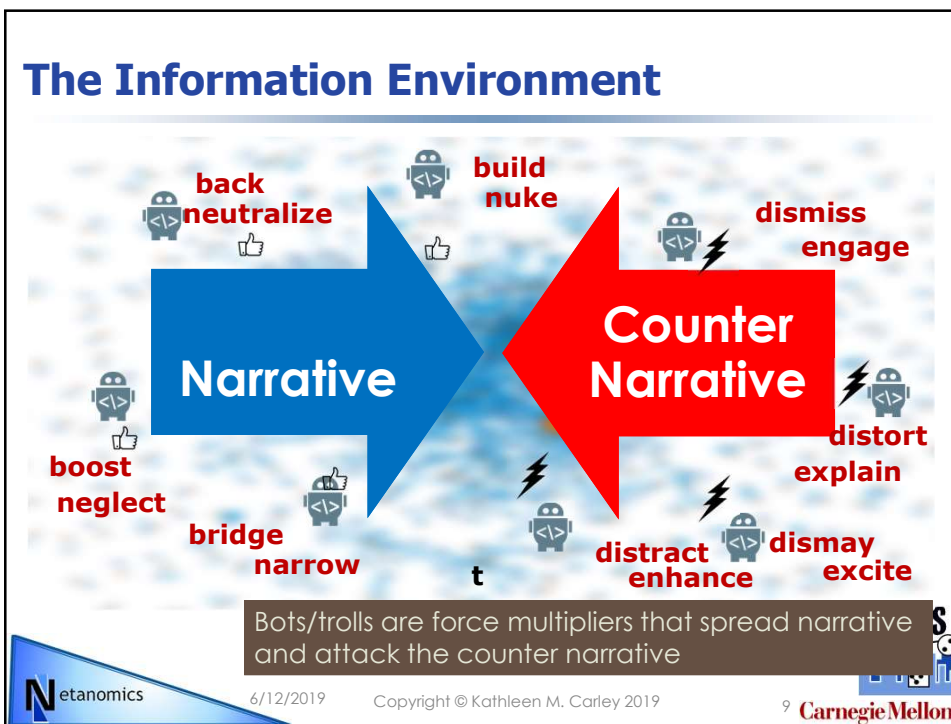

Content

Actors, groups  
 --- features of these  
 network structure, position  
 of opinion leader, interaction  
 between groups ...

## Key Findings

- Technology exploits
  - Manipulate privacy preserving schemes to enable multiple personas by same actor, or to increase trolls
  - Manipulate prioritization or ranking schemes
  - Manipulate timing and repetition features
  - Manipulate cross media linkages
- Social cognitive manipulations
  - Create appearance of larger or smaller group
  - Alter opinion leader status
  - Create appearance of consensus
  - Create appearance of multi-point confirmation
  - Alter cohesion
- General manipulations
  - Increase speed, scale, frequency, trending, send stories, repeat stories, increase modality

Positive
Negative

## Excite Trident Juncture PR with Russian

The Defense Ministers of Sweden, Norway, the Netherlands, and Germany.

The Defense Minister of Russia.

The Defense Minister of Poland.

## Tools of BEND

- BEND information maneuvers use diverse tactics and tools to exploit social media technology and so manipulate community and content
- Tools
  - Content focused
    - Memes
    - CUES
    - Images/videos
  - Community focused
    - Trolls
    - Bots
    - Cyborgs

## Bots in Network

Colored red if it has  
bot characteristics

## Not All Bot Detectors Agree

(a) Predicted Bots (Tier 1, 2, & 3)

(b) Predicted Bots (Tier 1 & 2) with Real Labeled Bots

## Social Influence Bots Can Manipulate Topic-Groups

Syria Focused Extremist Topic Group  
"Dense Community"

Suspended

Active

Firibi Benefactorbbbb

App Sign Up, solicits donations for children of Syria

Firibi Follower

Core-Firibi Nome Bot

## B.E.N.D. & Firibi Nome

**Build** – Firibi Nome bot @mentioned each other thus creating a group

**Back** – Firibi Nome bots followed Imam increasing his perceived level of influence

**Bridge** – This bridged a connection between the Imam’s topic group and the Firibi Nome’s group

**Dismay** – Messages were sent about needs of children of Syria

**Back** – Messages were sent directing people to charity cite for children of Syria

## Bot Intimidation Operation

For the 18-9 months, a determined actor has conducted an intimidation attack against Iona Craig, an Irish free lance journalist reporting on the conflict in Yemen [40]

- Numerous random accounts follow her account every day, some with disturbing profile images.
- As of 6 June 2018, our Tier 0 algorithm showed that 18,800 of her followers had bot-like screen names.

## Overall

Pattern	
Bots as secondary	yes
Cultural ethos mission groups and disinformation from/to them	Harder to disrupt
Calling out	Yes – direct lie
Calling out	No - mission
Satire	Yes – direct lie
Disinformation as positive action	Spreads further
Half life general or direct lie disinformation	short
Half life of mission driven disinformation	Much longer

## Used in the Russian Disinformation Campaign

Twitter	}	These were the core of the IRA campaign, and had the greatest impact
 Facebook		
 Instagram		
 Youtube		
 Pinterest		
 Tumblr	}	These seven were used to a lesser extent, but may provide interesting insights. Note that disinformation on these platforms is largely unexplored
 Paypal		
 Medium		
 Reddit		
 Gab		

## Challenge: Data Control & Management

- Data is not free and open
  - Providers dictate who can do what kind of science
- Data is often only a sample
  - Biases are often not known nor accounted for
- Data is not necessarily preserved
  - Replication is difficult if not impossible
- Data is not fully sharable
  - Reuse is limited
- Data production is time variant
  - Data providers change what is stored or collected
- Policies are out-of-sync with technology & science
  - Often not possible to collect the data needed to answer the policy question
